GN 2277.1

Adjustment plates
for bull´s eye levels GN 2277
SPECIFICATION
Stainless AISI 303 **NI**

INFORMATION
Adjustment plates GN 2277.1 are used in combination with bull´s eye levels GN 2277 (Type A) (see page 680).
The mounting bore holes offset by 120° allow the bull's eye levels and the mounting plate to be aligned in relation to the mounting surface. An alignment ball at the bottom surface of the adjustment plate serves as tilting point. Specific tightening torques of the bolts allow to be achieved, so that the bubble is located inside the marking ring once the horizontal alignment is reached.

TECHNICAL INFORMATION
- Stainless Steel characteristics (see page A26)

GN 2278

Bull´s eye levels
for insertion into bore holes

SPECIFICATION
Sensitivity
Type **30**: Angle minutes, bubble move by 2mm

Housing
Aluminium
anodized, natural colour **ALN**
anodized, black **ALS**

Spirit level element
Glass plastic body

Filling
coulourless-transparent **K**

Casting compound
mineral-based

INFORMATION
Bull´s eye levels GN 2278 are used to check the horizontal position of jigs, machines, devices, appliances and instruments.
The housing is grooved at its lower diameter d_3, making it easier to mount in place, e.g. by gluing.
The spirit levels are aligned in relation to the reference or contact surface, so that the bubble is located inside the marking ring once the horizontal position of the contact surface is reached.

ON REQUEST
- Filling, green-transparent
- Other sensitivities
- Housing in brass or Stainless Steel

Reference surface
Casting compound
Marking ring
